Soviet military fuel dump at MARIAKUT

1. The dump lies at the GUD fork in the BUDAPEST-VAC road; to it leads a siding railway from the VAC railway.
2. The dump is divided into three storage units, each with a capacity of 350,000 litres. Two of these contain petrol, the third holds paraffin. Each storage unit consists of one vertical container of 200 cubic metres capacity, and three horizontal containers of 50 cubic metres capacity each. All are buried, concreted and earthed-over; the vertical one is only just below ground, the horizontals lie with their upper surfaces about five metres below ground level. Each unit has its own pumping station.
3. The dump is entirely in Soviet hands, and is guarded by 500 soldiers, having their own small barracks there.
